242	1	When encountering a mechanical problem with their vehicle while on a freeway or expressway, drivers must: (1) pull their vehicle over to the side of the road to wait for emergency assistance. (2) stop immediately and ask their passengers to get out and seek help. (3) call and ask a friend to tow their vehicle.
243	1	On freeways or expressways, drivers: (1) may not drag race side by side and may not drive side by side in low speed (2) may drag race side by side, but may not drive side by side in low speed (3) may not drag race side by side, but may drive side by side in low speed.
244	2	Opposing traffic lanes on freeways and expressways are: (1) divided by road markings (2) by barriers (3) by traffic signals.
245	2	If the driver in the next lane signals that they are going to change lanes, a driver is required to: (1) speed up to prevent the other car from passing; (2) reduce speed accordingly and yield; (3) drive side by side with the vehicle and compete for the lane.
246	2	When vehicles are moving at high speeds, which of the following is true regarding a driver's vision: (1) It cannot be perfectly adjusted to the situation. (2) Visual ability will decrease as speed increases. (3) Visual ability will increase as speed increases.
247	2	When driving in heavy fog, heavy smoke, heavy rain, or gusty winds, drivers are required to reduce their speed and: (1) shorten the distance between themselves and the car in front of them (2) increase the distance between themselves and the car in front of them (3) no applicable regulations.
248	2	Drivers: (1) may not pass other vehicles under any circumstances. (2) may change lanes and pass other vehicles as long as they drive within the designated speed limits. (3) may not pass other vehicles except in designated areas of the freeway or expressway.
249	2	If you miss an exit ramp on a freeway or expressway: (1) Stop by the roadside, wait until there are no vehicles behind, then turn around and take the exit ramp. (2) Continue driving to the next exit. (3) Stop by the roadside, wait until there are no vehicles behind, then reverse onto the exit ramp.
250	3	The plum-blossom sign is: (1) a roadside decoration (2) the marker of an important highway (3) the symbol for a national freeway.
251	3	The inside lane of a freeway or expressway is provided for vehicle passing. Nevertheless, small vehicles: (1) may drive slowly in the lane (2) may not drive in the lane (3) may drive in the lane at the declared maximum speed limit.

Car regulations
(Multiple Choice Questions Bank)
【English version】

252	1	Except when passing on freeways or expressways, large vehicles are required to use: (1) the outside lane (2) the inside lane (3) any lane that is convenient for them.
253	3	When changing lanes, in addition to using the turn signal, which of the following is the most important for drivers to do? (1) Quickly cut into whatever lane is available. (2) Maintain a safe driving distance between their vehicle and the vehicle in front of them. (3) Maintain a safe driving distance between their vehicle and the vehicles both in front and in back of them.
254	3	Drivers (1) may speed if they are late. (2) may ignore traffic rules if they are in a hurry. (3) are required to abide by the traffic rules even if they are in a hurry.
255	1	What is defensive driving? (1) Taking precautionary action to prevent accidents. (2) Having outstanding driving skills. (3) Having good habits in your daily life.
256	3	Prior to merging into the main traffic lane of a freeway or expressway, drivers: (1) are required to decelerate on the acceleration ramp and verify it is safe before they merge into the main lane of traffic. (2) Turn on their left turn signal and go ahead and merge into the main lane of traffic. (3) accelerate on the acceleration ramp and verify it's safe before merging into the main lane of traffic.
257	2	When pulling off the main traffic lane of a freeway or expressway, drivers: (1) may do so whenever. (2) must slowly edge over to the right as they reduce speed. (3) can immediately pull over after turning on their right turn signal.
258	3	When driving through an urban area at night and there is oncoming traffic or cars within 100 meters in front of you, you are required to: (1) wear colored glasses. (2) switch to your high-beam headlights. (3) use your low-beam headlights for safety.
259	1	When driving in a flooded area, drivers are required to: (1) reduce their speed (2) pass through quickly. (3) use their brakes as much as possible.
260	3	If vehicles approaching from the opposite direction have bright headlights or high beams on, the driver should: (1) retaliate by using high-beam headlights; (2) drive on the center line; (3) stay on the right side, reduce speed, and be aware of the surroundings.
261	3	If your vehicle is skidding, you should: (1) steer in the opposite direction of the skid. (2) hit your brakes immediately. (3) steer slowly in the direction of the skid.
262	1	If a vehicle causes an accident, the drivers of both vehicles are required to: (1) stay at the site of the accident and call the police immediately. (2) leave the site of the accident if they don't think they are at fault. (3) argue with the other driver in order to avoid any responsibility for the accident.

Car regulations
(Multiple Choice Questions Bank)
【English version】

263	2	Drivers who disagree with the decision of the regional assessment committee regarding accident liability: (1) have to obey to the decision without objection (2) may request a review by authorities. (3) may file a complaint with the judicial authority.
264	2	As driving speed increase, the driver's field of vision: (1) remains unchanged. (2) becomes narrower. (3) becomes wider.
265	1	Speeding is one of the main causes of road accidents. Road accidents can be prevented by: (1) managing one's time, and starting travel at the appropriate time, so the driver does not have to rush and go over the speed limit; (2) decreasing the engine's fuel intake speed; (3) installing bigger, better brakes on the vehicle.
266	3	Which of the following is incorrect for vehicles that are turning left at the intersection? (1) Turn left after the left turn arrow turns green. (2) Turn left only after all vehicles proceeding straight have passed through the intersection. (3) Turn left as soon as the light turns green.
267	1	Which of the following is the main cause of traffic congestion and accidents? (1) Neither drivers nor pedestrians abide by the traffic rules. (2) There are too many vehicles on the road. (3) Roads are not wide enough to accommodate all traffic.
268	1	Accidents happen when people either disobey or ignore traffic rules. Which of the following is the most important task in connection with upgrading traffic safety? (1) Helping drivers learn to drive better through traffic rule training programs. (2) Helping drivers improve their driving skills. (3) Helping drivers learn how to better maintain their vehicles.
269	1	When approaching a multi-lane intersection: (1) Do not change lanes in the double white line area. (2) You can change lanes in the double white line area for the convenience of turning left or right at the intersection. (3) You can change lanes in the double yellow line area.
270	1	If the distance illuminated by the headlights suddenly grows longer, it's probably because the vehicle is moving downhill. Therefore, the driver is required to: (1) slow down. (2) speed up. (3) turn off their headlights for safety reasons.
271	1	If the light from headlights suddenly disappears at night, it's probably because there is a big gap in the road or bridge, or the road surface has collapsed. Therefore, drivers are required to: (1) get out of their vehicle and check out the situation before they drive onward. (2) disregard it and continue to drive as usual. (3) turn off their headlights to reduce any reflection and improve visibility of the surrounding terrain.

Car regulations

(Multiple Choice Questions Bank)

【English version】

272	1	When driving in strong winds and feeling the vehicle shaking, one should: (1) Firmly grip the steering wheel, reduce driving speed, increase following distance, and avoid changing lanes. (2) Accelerate to pass through quickly. (3) It doesn't really affect driving safety, so no action is needed.
273	3	Accidents often happen while making a turn because drivers: (1) ignore their blind spots. (2) ignore the difference in the location of the front and back of their vehicle. (3) ignore both their blind spots and the difference in the location of the front and back of their vehicle.
274	3	Pre-driving maintenance and regular checkups are particularly important for vehicles driven on freeways or expressways. Therefore, (1) just making sure you have enough gas or petrol is sufficient. (2) just making sure you have enough gas or petrol and battery power is sufficient. (3) you must be sure that your car has enough fuel, water, and battery power.
275	3	Drunk-driving causes drivers to have tunnel vision which gives drivers the impression that they are driving in a tunnel in which the area directly in front of them is brightly lit, but the areas on the periphery are dark. Therefore, a drunk driver's field of vision: (1) does not change at all. (2) becomes wider. (3) becomes narrower.
276	1	When large vehicles pass, it creates a strong suction force, so when driving alongside or facing an oncoming large vehicle: (1) Hold the steering wheel firmly. (2) Relax the steering wheel. (3) Swing the steering wheel left and right.
277	3	Prior to driving on freeways and expressways, drivers should listen to the radio and find out traffic conditions by dialing: (1) 104. (2) 117. (3) 1968.
278	3	When driving on an expressway or freeway, (1) only large vehicles may NOT use the inner lane. (2) only slow vehicles may NOT use the inner lane. (3) both large vehicles and slow vehicles may NOT use the inner lane.
279	3	You are driving on a road with two lanes. A motorcycle is driving in the same lane in front of you. You should: (1) honk your horn to force the motorcycle to return to the slow lane. (2) drive side by side with the motorcycle and then pass it. (3) either follow the motorcycle or pass it using the inside fast lane.
280	1	When a car driver enters a highway or expressway, what should he/she do: (1) Before merging into the outside lane, use the right acceleration lane to gradually increase speed, use the left turn signal, and turn your head to see if there is any oncoming vehicle in the left rear. (2) As soon as the turn signal is on, move directly into the outside lane. (3) You can move directly into the outside lane or the inside lane.

Car regulations
(Multiple Choice Questions Bank)
【English version】

281	1	To pass the blood alcohol level test, the breathalyzer test must show that a driver's blood alcohol level does not exceed: (1) 0.15 milligrams. (2) 0.25 milligrams. (3) 0.55 milligrams.
282	1	If an accident victim is in shock, their face will become: (1) pale. (2) light gray. (3) flushed.
283	3	If an accident victim is bleeding and the blood is scarlet red and spurting out, it means the bleeding is: (1) venous bleeding. (2) from a superficial surface wound. (3) arterial bleeding.
284	2	If a car crash causes fire and consequently reduces the amount of oxygen in the air, or if there is something blocking the airway passage of a victim, which of the following will occur? (1) shock (2) suffocation (3) vomiting
285	2	If a broken bone pierces a victim's skin and is causing massive bleeding, what should you do? (1) Attempt to push the bone back into position. (2) Apply pressure to stop the bleeding. (3) Send the victim to a hospital for treatment.
286	1	Which of the following speeds is the most fuel efficient speed for cars traveling on an expressway or freeway? (1) 80 to 90 km per hour. (2) 50 to 60 km per hour. (3) 110 to 120 km per hour.
287	2	Which of the following gases discharged by vehicles and motorcycles causes global warming? (1) carbon monoxide. (2) carbon dioxide. (3) nitrogen.
288	3	If a car carries an infant without properly strapping them in an infant car seat, the driver is subject to: (1) suspension of their driver's license. (2) cancellation of their driver's license. (3) a fine.
289	2	If driver leaves a child younger than 6 years old, or a child that requires special care alone in a vehicle, the driver is subject to: (1) a fine (2) a fine and 4-hour traffic safety lecture (3) a fine and traffic violation points.
290	3	A driver will be cited if they are caught by electronic monitoring equipment doing which of the following? (1) Driving on the shoulder of a road. (2) Failing to maintain a safe driving distance. (3) Both statements are true.
291	2	What is the penalty for driving a vehicle without license plates after already having been cited at least once? (1) There's no penalty, but the driver's license will be suspended. (2) The vehicle owner will be fined and their driver's license will be revoked. (3) The driver will be fined.

Car regulations
(Multiple Choice Questions Bank)
【English version】

292	3	If a child younger than (1) 4 years old (2) 5 years old (3) 6 years old, or a child requiring special care is left alone in a vehicle, the driver will be fined NTD 3,000 and be required to attend a 4-hour traffic safety class.
293	1	Drivers who exceed the designated maximum speed limit by how many kilometers per hour shall be fined NT\$6,000 ~ NT\$36,000 and be immediately prohibited from driving on the spot?: (1) 40km/hr (2) 50km/hr (3) 60 km/hr.
294	2	Which of the following is true when driving on road with a safety island that separates the fast and slow lanes? (1) Right turns are allowed. (2) Right turns are not allowed. (3) There is no applicable rule.
295	3	If a bus driver is found to be driving drunk, the driver's license will be suspended for at least: (1) 2 years; (2) 3 years; (3) 4 years.
296	3	If a driver has had his license cancelled because he caused an accident that resulted in death, he won't eligible for a driver's license for: (1) eight years; (2) 10 years; (3) 12 years from the date of the cancellation.
297	1	Large vehicles traveling on a road with more than three lanes, unless they intend to turn left, are prohibited from using: (1) the inner lane; (2) the middle lane; (3) the outside lane.
298	2	If a motorcycle over 550 cc displacement breaks down on an expressway, the driver is required to turn off the driving lane, turn on the emergency lights, move the motorcycle off the road, and place a warning sign: (1) 50 meters behind the vehicle; (2) 100 meters behind the vehicle; (3) 200 meters behind the vehicle.
299	2	Keeping a proper following distance helps prevent accidents because: (1) Following the vehicle ahead prevents deviation from the main road. (2) It provides sufficient reaction time and space. (3) It keeps up with the vehicle ahead and prevents falling behind.
300	1	The minimum safe driving distance should be: (1) larger than (2) smaller than (3) equal to the space required to stop the vehicle.
301	1	If vehicles carrying cargo and traveling at a high speed have placed the heaviest cargo on the bottom, (1) stability improves. (2) stability decreases. (3) stability remains unchanged.
302	2	The longer the wheelbase, the larger the distance between the inside and outside wheels. When turning, vehicles with a larger wheelbase thus require the road width to be (1) narrower (2) wider (3) the same.

Car regulations
(Multiple Choice Questions Bank)
【English version】

303	3	After driving on a flooded road, the driver should: (1) turn on the lights; (2) keep their foot on the clutch; (3) test the brakes.
304	3	Which of the following statements is correct: (1) If warning lights are on in the dashboard, you can continue driving the vehicle without concern. (2) If the engine is smoking, you can continue driving until the vehicle stops smoking. (3) If the brakes fail, immediately shift to a lower gear, turn on the right turn signal, and pull over to a spacious area on the roadside.
305	2	If a driver causes an accident, but no one is killed or injured, and the vehicle is still drivable, which of the following are they required to do? (1) Wait for the police to arrive; (2) Mark the position of the vehicle on the road and then pull off to the roadside; (3) Notify their insurance company.
306	1	After marking the position of any relevant evidence on the ground in an accident, the vehicles involved must be pulled over to the roadside immediately if: (1) it is a minor accident and no one has been killed or injured; (2) someone has been severely injured; (3) someone has been killed.
307	2	If an accident takes place on a road with a speed limit over 50 km per hour, how many meters behind the vehicle are the drivers required to place a vehicle breakdown warning sign? (1) 50~100 meters. (2) 30~100 meters. (3) 5~30 meters.
308	3	Which of the following is correct concerning who has the right of way? (1) Vehicles going straight are required to yield to the vehicles making turns. (2) The vehicle that enters an intersection first has the right of way. (3) Vehicles making turns are required to yield to vehicles going straight.
309	2	The persons or parties involved in an accident are required to find: (1) relatives and friends to vouch for them; (2) eyewitnesses to support them; (3) legal council to determine the facts of the case.
310	3	Within what period of time may a person involved in an accident request an official report verifying liability for the accident? (1) 1 month (2) 3 months (3) 6 months
311	1	When a car or motorcycle enters a gas station for refueling: (1) The engine should be turned off before refueling. (2) Refueling can be done whether the engine is on or off. (3) The engine must remain on to keep the air conditioning running.
312	3	When refueling a vehicle in a gasoline station: (1) drivers may make calls and answer their cell phone; (2) drivers may answer their cell phone, but may not make calls; (3) drivers are strictly prohibited from either making calls or answering their cell phone.

Car regulations
(Multiple Choice Questions Bank)
【English version】

313	3	Drivers with a green light at an intersection: (1) have the right of way, so they should speed up and pass through the intersection quickly; (2) are required to come to a complete stop before proceeding through the intersection; (3) are required to slow down and pass through the intersection cautiously.
314	3	If there are yellow flashing lights at an intersection, drivers should (1) come to a complete stop and look both ways before proceeding cautiously through the intersection. (2) proceed through the intersection quickly without first coming to a complete stop. (3) look both ways and then proceed through the intersection cautiously.
315	2	At an intersection with no traffic sign, what should drivers do to ensure safety? (1) Look first right and then left before proceeding through the intersection. (2) Look first left and then right before proceeding through the intersection. (3) It doesn't matter which direction they look first.
316	1	When driving on a road, drivers should: (1) keep their eyes forward while watching for traffic on both the left and the right; (2) look around and eat; (3) chat and have fun with any passengers in the vehicle.
317	2	While driving, one should pay attention to: (1) shops along the roadside. (2) Traffic signals, signs, and the dynamics of surrounding vehicles and pedestrians. (3) The scenery around.
318	2	When driving at night which is the most difficult to see? (1) Moving pedestrians. (2) Pedestrians and objects that are motionless. (3) Moving vehicles.
319	2	When two vehicles approaching from opposite directions and both turning either left or right onto the same road, what are they required to do if the road has more than two lanes? (1) The vehicle turning left is required to turn into the outside lane. The vehicle turning right is required to turn into the inside lane. (2) The vehicle turning left is required to turn into the inside lane. The vehicle turning right is required to turn into the outside lane. (3) The drivers can turn into whichever lane they like.
320	1	Centrifugal force is produced as a vehicle turns. Therefore: (1) drivers are required to slow down before they turn to maintain control of the vehicle; (2) drivers are required to slow down as they turn to maintain control of the vehicle; (3) both statements are true.
321	1	The faster a vehicle moves along a curve: (1) the greater the centrifugal force; (2) the lesser the centrifugal force; (3) the centrifugal force produced by the vehicle remains unchanged.

Car regulations
(Multiple Choice Questions Bank)
【English version】

322	2	Two-stage opening means: (1) opening the door in two stages without first verifying that there are any vehicles or pedestrians approaching from either the front or rear; (2) first opening the door slightly, and then completely opening the door after it has been determined that no vehicles or pedestrians are approaching from either the front or rear; (3) both statements are true.
323	3	When driving uphill, drivers should shift into second gear. When driving downhill, which gear should drivers use? (1) Fourth. (2) Third. (3) Second.
324	3	When driving down a long slope, what is the best way to control speed? (1) Use the foot brake; (2) Use the hand brake; (3) Shift into to a lower gear and using the engine to slow the vehicle down.
325	1	Drivers should shift into low gear when driving downhill. What is the best time to shift into a lower gear? (1) Before the vehicle starts moving downhill. (2) As the vehicle is picking up speed moving downhill. (3) Both statements are true.
326	2	If a driver slams on their brakes and the brakes lock, the braking distance will (1) decrease. (2) increase. (3) remain unchanged.
327	3	If a driver slams on the brakes during an emergency and the brakes lock, and the driver turns the steering wheel to the right, the vehicle will: (1) move to the right; (2) move to the left; (3) go out of control.
328	2	Which of the following should be the top priority when driving? (1) Driving as slow as possible. (2) Keeping a safe distance from the vehicle in front of you. (3) Closely following the vehicle in front to ensure that nothing goes wrong.
329	3	While driving, if there is an accident on the road ahead and the police are already at the scene handling it, one should: (1) Use a mobile phone to livestream and inform relatives and friends. (2) Park the car by the roadside and watch to broaden one's knowledge. (3) Take a detour and avoid converging at the scene to prevent traffic congestion.
330	1	Which of the following statements is correct? (1) The driver, the frontseat passengers, and the rear seat passengers of a small vehicle are required to wear safety belts; (2) The driver must use the turn signal after starting the car; (3) By law, children must be seated in the front.
331	2	Which of the following is incorrect regarding pre-driving safety? (1) The driver, the front-seat passengers, and the rear seat passengers of a small vehicle are required to wear safety belts; (2) By law, children must be seated in the front; (3) The driver must use the turn signal before starting the car.

Car regulations
(Multiple Choice Questions Bank)
【English version】

332	2	Drivers are required to look both right and left before making a turn or changing lanes because: (1) they have to check for vehicles coming from the front; (2) they have to check areas of the road not visible in the rear view mirror; (3) they have to look past any glare on the windshield.
333	1	Drivers should do a normal maintenance check to ensure the car is functioning properly: (1) every time before they drive; (2) once a week; (3) since the vehicle is checked regularly at a garage, other maintenance checks are not necessary.
334	1	Vehicles have to be checked before being driven every time, (1) as well as undergoing regular maintenance. (2) so no other maintenance is required. (3) Neither statement is true.
335	2	Which of the following doesn't have to be checked before driving? (1) The fuel level. (2) The mileage. (3) The tire pressure.
336	1	Engine oil should be checked regularly (1) and replaced regularly. (2) but does not need to be replaced regularly. (3) and replaced depending on the brand of oil.
337	3	When checking the oil, drivers are required to (1) have their vehicle parked on a flat area. (2) have their engine turned off. (3) Both statements are true.
338	2	Where is oil poured into the engine? (1) Where the dip stick is located. (2) The oil hole on the engine. (3) The radiator.
339	3	What is true about changing the oil filter? (1) The type of oil filter depends on the brand of oil being used. (2) It's not necessary to change the filter. (3) Drivers are required to change the oil filter in accordance with the requirements stated in the user's manual.
340	1	To add more fluid to the brakes, (1) drivers have to use the exact same brake fluid that was previously used. (2) drivers may use whatever brake fluid they prefer. (3) drivers may use engine oil as a brake fluid if there is no brake fluid available.
341	2	If the battery is getting low on water, drivers should pour (1) sulfuric acid into the battery. (2) distilled water into the battery. (3) regular tap water into the battery.
342	3	When drivers are checking the fluid level in the battery, they must check: (1) just one place; (2) two places; (3) check all the places where fluids are added.
343	2	Which of the following should not be used if checking the battery fluid at night? (1) A flashlight. (2) A lighter. (3) A light powered by the vehicle.

Car regulations

【English version】

344	2	Which of the following prevents corrosion of the battery terminal and enhances electricity conduction? (1) Paint. (2) Grease. (3) Asphalt.
345	2	When using one vehicle's battery to jump start the battery of another vehicle, what is true about the jumper cables? (1) The thinner the cables, the better. (2) The thicker the cables, the better. (3) A normal copper wire with good electrical conductivity is adequate to do the job safely.
346	2	The engine starter is powered by (1) the alternator. (2) the battery. (3) both the alternator and battery.
347	2	Vehicles with a lot of electrical devices installed (1) have the potential to generate more horse power. (2) can potentially catch fire easier. (3) has no effect on engine performance.
348	1	The anti-rust agent in the radiator water (1) has to be changed regularly. (2) has to be changed when the radiator water is changed. (3) never needs to be changed.
349	1	Residue that builds up over time in the cooling system (1) causes poor cooling water circulation. (2) lowers the engine temperature. (3) prevents water from leaking out of the engine.
350	2	If the engine overheats, the driver should (1) continue to drive their vehicle at the same speed. (2) pull over and stop as soon as they can do so safely. (3) slow down and continue to drive their vehicle.
351	3	A dirty air filter will cause a vehicle to (1) consume excessive fuel. (2) lose power. (3) Both statements are true.
352	3	If spark plugs are malfunctioning, which of the following is likely to happen? (1) Acceleration will be more difficult and fuel consumption higher. (2) Starting the vehicle will be difficult, if not impossible. (3) Both statements are true.
353	2	If an engine temperature indicator points to H, it means that the temperature is (1) normal. (2) too high. (3) too low.
354	2	If there is a large gap between the steering wheel and the steering column, it will cause: (1) steering failure. (2) unstableness in steering. (3) no effect on steering.
355	3	Which of the following is the most important advantage of power steering? (1) Power steering allows drivers to change their speed more easily. (2) Power steering allows drivers to make wider turns. (3) Power steering helps drivers turn their vehicle more easily.

Car regulations

(Multiple Choice Questions Bank)

【English version】

356	1	Many vehicles have a cigarette lighter installed in the dashboard which requires a simple touch of a button to operate. Drivers (1) are required to concentrate on driving and may not use the cigarette lighter when operating the vehicle. (2) may use the cigarette lighter if they feel they can do so safely. (3) should use the cigarette lighter because smoking while driving will keep them awake and more alert.
357	1	Which of the following is the most appropriate time to adjust the seat? (1) Before driving. (2) During driving. (3) After driving.
358	3	Which of the following is the ideal height for the driver's seat headrest? (1) Above the driver's head. (2) Below the driver's shoulders (3) The same height as the driver's ears.
359	2	Back doors have a safety lock to protect children from injuries caused by carelessly opening the doors. Therefore, if the safety lock is engaged, (1) the back doors can be opened only from inside the vehicle. (2) the back doors can be opened only from outside the vehicle. (3) the back doors cannot be opened from either inside or outside the vehicle.
360	3	Which of the following is the best time to press the trunk release button in a vehicle? (1) After the vehicle is parked. (2) After the vehicle is parked and the vehicle's transmission is put into park. (3) After the vehicle is parked, the vehicle's transmission is put into park, and the manual brake has been engaged.
361	1	The function of installing rearview mirrors and interior mirrors in a car is to: (1) Help the driver increase side visibility and grasp the road conditions behind the vehicle. (2) Provide convenience for the driver to apply makeup. (3) Serve as an alternative screen for in-car entertainment systems.
362	3	Which of the following is the normal color of the exhaust discharged by a petrol or gasoline engine? (1) Black. (2) Blue and white. (3) It's colorless.
363	2	If a petrol engine discharges black exhaust, it means (1) the petrol is being completely combusted. (2) the petrol is not being completely combusted. (3) The oil is being combusted.
364	3	Before starting an automatic shift vehicle, the driver must first shift the transmission into (1) D. (2) R. (3) P.
365	2	Prior to shifting from park into reverse or drive, the driver should (1) push the accelerator pedal. (2) push the brake pedal. (3) just go ahead and shift.
366	3	When parking an automatic shift vehicle, to prevent the vehicle from rolling, the driver should engage the hand brake and shift the vehicle into (1) drive. (2) reverse. (3) park.

Car regulations

(Multiple Choice Questions Bank)

【English version】

367	1	In addition to disengaging the hand brake and putting the transmission in neutral, what else must be done when towing an automatic frontwheel drive vehicle to avoid damaging the transmission? (1) Lift the front wheels, keeping the rear wheels on the ground, and tow the vehicle by pulling from the front. (2) Lift the rear wheels, keeping the front wheels on the ground, and tow the vehicles by pulling from the rear. (3) All 4 wheels should remain on the ground and the vehicle should be pulled from the rear.
368	2	When switching gears from drive to reverse or from reverse to drive, (1) it is not necessary for the driver to wait for the vehicle to come to a complete stop first. (2) the driver must wait for the vehicle to come to a complete stop first. (3) it doesn't matter if the vehicle has come to a complete stop or not before the driver switches gears.
369	3	When should tire pressure be checked? (1) Anytime. (2) When the temperature of the tires is higher after driving the vehicle. (3) Before driving, when the tires are still at room temperature.
370	1	Insufficient tire pressure is likely to cause (1) both the inner and outer side of the tire to wear down more quickly. (2) the middle of the tire to wear down more quickly. (3) the steering to become lose.
371	3	Insufficient tire pressure is likely to cause (1) better fuel efficiency. (2) steering to become easier. (3) the steering wheel to become stiff requiring more effort to steer and a loss of fuel efficiency.
372	2	Unequal tire pressure is likely to cause (1) the engine to knock. (2) the car to automatically pull in one direction. (3) nothing.
373	2	Which of the following is the most fragile part of the tire? (1) The treads. (2) The outer side. (3) The lip around the opening in the center of the tire.
374	1	The treads down the center of a tire may wear down quickly if (1) the tire pressure is too high. (2) the tire pressure is too low. (3) the vehicle load is too heavy.
375	2	Excessive tire wear: (1) Makes the vehicle more stable when driving. (2) Affects vehicle steering and braking distances. (3) As long as the tires do not burst, one can continue driving on.
376	2	If brakes are used repeatedly, the brake temperature rises and braking performance: (1) improves. (2) decreases. (3) remains unchanged.
377	1	If a vehicle travels downhill for a long period and the brakes are continuously applied, the brake fluid temperature usually (1) rises. (2) remains unchanged. (3) drops.
378	3	If drivers smell a burning odor when a vehicle is traveling down a long slope, it's probably because (1) the car is overheating. (2) the clutch is slipping. (3) the brake is being used excessively.

Car regulations
